HDFC-1000 Foil Cutter

- Solid aluminum construction ½" thick plates for the motor and chuck assembly.
- Dual steel tie bars for frame strength with four (4) bolt down hole locations.
- Two (2) precision 1" diameter hardened wear free shafts for tie rods in machine.
- Accurate positioning of sliding carriage platform with four (4) pillow block bearings for improved width stability while cutting. Also locking position knob in front.
- Manual lever control of blade assembly with four (4) linear ball bushings, 5/8" diameter hardened steel precision shafts as pushrods for easy control of blade.
- Positive blade travel stops to prolong blade edge.

- One hp motor for fixed rotation while cutting - with heavy duty two pole switch.
- High torque 1" wide belt drive of pulleys for smooth chuck rotation.
- Solid Aluminum chuck which rotates in 1" diameter precision bearings.
- Machined steel clamps/jaw self centering, with drive screw to open/close on roll.
- Chuck shaft with improved bearing ends for greater support and holding of roll.

- Roll diameter to 8" on one inch (1") core, masters to 30" long.
- Non rotating mandrel with drive bearing and pinned sleeve.
- Tailstock with positive "lever lock" holds keyed mandrel end secure.
- Quick measure reference in front on tie bars.

- Round 10" diameter non rotating blade with 1" ID, single 5/8" bevel
- Safety guard for flush blade edge around knife.
- Operator load-unload pivot safety guard.
- Drive area safety guard covers drive section by pulleys and motor.
- Additional clear plexiglass guard on vertical blade assembly for operator safety.

- Easy to operate, fully assembled, ready to cut rolls.
- Price includes crating for shipment

Price: \$ 6,749.00 F.O.B. Ghent. NY
